How-To Activate and Use Text-to-Speech for iOS

How to Activate

1. Go to **Settings** > **Accessibility** > **Spoken Content**

2. Turn on **Speak Selection**.
   - With this activated a speak button will appear when you select text.

3. Turn on **Speak Screen**.
   - With this feature activated, swiping down with two fingers from the top of the screen will cause the entire contents of the screen to be read aloud.

4. (Optional) Turn on **Highlight Content**
   - With this feature enabled, content will be highlighted as it is spoken aloud.

5. (Optional) Tap on **Voices** to adjust the voice used for text-to-speech

6. (Optional) Use the slider underneath of **Speaking Rate** to adjust the speed in which content is read aloud.

How to Use

1. To activate **Speak Screen**, swipe down with two fingers from the top of the screen. The entire contents of the screen will then be read aloud.

2. To activate **Speak Selection**, open any application that contains text. This includes Word, Safari, Gmail, etc. Next, tap on or select a piece of text, and choose Speak.
