

# Assistive Technology Program and Services (K-12)

## What We Offer

### **Assistive Technology Consultations**

We provide consultations on assistive technology solutions for students, teachers, parents, and educational support professionals.

### **Assistive Technology Assessments**

Our formal assistive technology assessments include a full student evaluation and a detailed report with implementation recommendations and a training plan. Neil Squire collaborates with Educational Support Teams and natural supports to identify the most effective tools for each student.

### **Assistive Technology Training**

We provide one-on-one and group training for students and parents to support a coordinated, team-based approach to integrating assistive technology into a learner's education.

### **Professional Development Sessions**

We deliver presentations and training to help

professionals build their knowledge and capacity in assistive technology tools and implementation. Professional development is available to teachers, educational assistants, behaviour interventionists, physiotherapists, occupational therapists, speech-language pathologists, psychologists, and more.
